A different kind of energy company.
The world is changing all around us — every single day. At NRG, we see this change as an opportunity to make things better. For our industry. For the environment. For each other.

Also changing? Customer expectations. Everyone expects more — and we’re on it. We’re changing the way people think about and use energy by giving them smarter technologies, better choices and cleaner solutions to build a sustainable future.

Welcome to NRG.
As a Fortune 500 company and the nation’s largest competitive power generator, we credit our growth to our three-pronged strategy. We are working to:

**Enhance our core generation**
We have 47,000 megawatts (MW) of fossil, nuclear, solar and wind capacity — enough to supply more than 40 million homes. That’s a lot of power. And responsibility. So, we’re working hard to safely generate cleaner electricity.

**Expand our retail reach**
We’re putting a fresh spin on electricity by empowering our retail customers with smart energy solutions that deliver more. More access. More control. More personalization.

**Grow new “green” businesses**
Everyone should have access to cleaner, smarter energy choices — and we’re leading the charge. Renewable energy development. Electric vehicle (EV) support. Smart grid technology. These are not promises for the future — this is reality, and it’s happening right now at NRG.

New technologies are emerging that have the potential to dramatically alter the way people use energy. NRG is taking a key role in helping advance these innovations that will give customers access to choices that they’ve never had before.

NRG is determined to lead a 21st-century energy revolution, making the industry landscape cleaner, more personalized and less grid-dependent.
Our companies

**Reliant**® provides electricity, home services and smart energy solutions to customers — including homes, small and large businesses, manufacturing facilities, government entities and commercial institutions. Reliant offers a range of electricity plans to fit the varied needs and lifestyles of electricity consumers.

**Energy Plus**® combines electricity service with a unique rewards program featuring cash back, airline miles, hotel and retail points, and college savings from almost 100 industry-leading partners.

**Green Mountain Energy Company**® is the nation’s longest-serving renewable energy retailer — changing the way power is made for more than 15 years.

**NRG Home Services**® provides a full complement of home warranty, maintenance and repair services to homeowners in Texas and Arizona, ranging from HVAC and home efficiency to plumbing, electrical and home warranty services.

**NRG Residential Solar Solutions**® brings solar power to homeowners through a simple and affordable leasing program.

**NRG Solar**® is one of the nation’s largest developers of solar power, from utility-scale solar generating facilities to commercial installations on rooftops and sports stadiums.

**NRG Thermal**® operates thermal and chilled water facilities serving major businesses in downtown metropolitan areas and owns electricity generation facilities in Delaware, Pennsylvania and New Jersey.

**NRG Energy Services**® provides cost-competitive, professional operation and maintenance services — from component repair to backup generation to complete plant and facility operations and maintenance — for power generation and industrial customers worldwide.

**NRG eVgo**® is building the nation’s first privately funded, comprehensive electric vehicle ecosystem, combining home, office and multi-family community charging stations with fast-charging stations at convenient retail locations to give EV drivers the freedom and confidence of knowing they will always have power on the go.

**Petra Nova**® is developing innovative technology to capture carbon dioxide from existing coal-fueled generation — improving the environment and creating a revenue stream by using enhanced oil recovery to increase domestic oil production.

Thermal
All of the district energy systems and combined heat and power plants we own and operate have a strong track record of success, yet each is unique in its configuration and service. Some heat, some cool, some do both — and still others provide steam for industrial processes.

Campaigns for change

NRG Global Giving
Improving the quality of life in the communities we serve is one of our core values.

2012:

$5.4 million donated

17,000+ hours volunteered supporting

700 + charitable organizations in 33 states 3 countries

3-to-1 matching of employee donations for natural disaster aid

$428,000 raised supporting Hurricane Sandy relief efforts — our single-largest employee charitable campaign ever

$1 million commitment through the Clinton Global Initiative to build solar projects in Haiti, enabling sustainable economic opportunities
econrg
We’re meeting the environmental challenges of today by driving investment in zero- and low-carbon energy technologies, advocating for clean energy policies and participating in community environmental initiatives.

Air quality  Water quality and conservation  Waste reduction

Efforts focus on

2002-2012:

Reduced emissions at existing facilities:

41% for carbon dioxide  74% for sulfur dioxide  71% for nitrogen oxide

2012:

19,000 tons equivalent of carbon credits purchased to voluntarily offset the NRG carbon footprint from business travel and company-owned vehicles

1.5 million gallons of water saved

Repowering NRG
We’re replacing older fossil fuel generators with cleaner, more efficient units to reduce air emissions, greenhouse gases and water usage.

2013:

Complete construction on three new plants (1,345 MW)

3,600 MW of repowering projects under construction or fully permitted

2018:

575 MW of coal-fueled plants converted to natural gas

3,600+ MW of older coal units retired
**Strive** is a set of values that guides our strategies, decisions and behaviors.

**Safety** – You’ve heard the saying “safety first.” At NRG, we wholeheartedly believe it — which is why we have an ultimate goal of zero injuries and a focus on preventive safety practices.

**Teamwork** – It’s crucial that we put our heads, skills and efforts together. Working as a team helps us solve problems and address business opportunities.

**Respect** – We listen closely, treat each other with respect, create value for every customer and strive to be a good neighbor to our local communities. We also respect the environment and work continuously to protect it.

**Integrity** – We say what we mean and we honor our word with everyone — colleagues, investors, regulators, customers and the communities we work with.

**Value Creation** – We always aim to create value — as individuals, as teams and as a company. Our capital resources, physical assets and professional expertise must be applied in a way that creates maximum value.

**Exemplary Leadership** – Regardless of our job titles, we’re all leaders at NRG. When we develop plans, communicate effectively and act decisively, we’re exercising leadership.
